Weed Tire Chains and You Can Absolutely Prevent Skidding

Careful driving will not prevent a skid, but Weed Tire Chains plus Careful Driving form a combination that insures absolute security.

No matter how skillfully and carefully you may drive, you and your passengers are in imminent danger if Weed Tire Chains are not on all four wheels of your car when streets are wet and treacherous.

Direct responsibility is yours the moment you take the wheel of your car. You at once become the guardian of your passengers. They trust in your prudence and in your common sense. Under no circumstances are you justified in taking chances.

Give your Weed Tire Chains a chance o - rform their mission. Don't leave them in the garage or tool box. Put them on all four tires before the elements whip the streets into black deadly skidways. Only a moment of your time and their steel forged protection will be securely chaining your cartosafety.

Weed Tire Chains are also made to meet the demand for an efficient traction and anti-skid device for tracks equipped with single and dual solid tires or with the very large pneumatic tires. They are so constructed that they satisfactorily meet the requirements of heavy truck service in mud, sand or snow.
